

Week 12: Q2

Due on 2019-10-27, 23:59 IST

A partial code fragment is given. The URL class object is created in try block. You should write appropriate method() to print the protocol name and host name from the given url string.

For example:

```
https://www.xyz.com:1080/index.htm
```

```
protocol://host:port/filename
```

Select the Language for this assignment. Java

File name for this program :

```
1 import java.net.*;
2 public class Question2{
3     public static void main(String[] args){
4
5     try{
6         URL url=new URL("http://www.Nptel.com/java-tutorial");
7         //use appropriate method() to print the protocol name and host name from url
8         //Write the method() by replacing the blank space.
9         System.out.println("Protocol: "+url.getProtocol());
10        System.out.println("Host Name: "+url.getHost());
11    }
12    catch(Exception e){System.out.println(e);}
13 }
14 }
15 }
```
